### About me

Java backend software developer. Consultancy focused on banking clients. Passionate software developer, with some years on the shoulders. Currently maintaining and developing new features for a legacy key product, in a very small team, using Java/Spring as backend, Spring Batch and Apache Spark (GraphX library) and Kafka. I'm committed in application maintenance for other legacy applications based on Java (6/7/8) and older versions of Spring. In my current job I'm also a Buddy, I love to listen, help and support new entries during their first month and beyond.

### Education

1994–1998 **High school diploma**, *ITIS Tito Sarrocchi*, Siena

### Experience and Skills

2014– **Senior Software Developer**, *GFT* ([www.gft.com/it](http://www.gft.com/it))  
IT solutions focused on banking clients

- Frameworks - languages
